

Mr. Rabbit replied, “Oh no. Pineapples don’t grow on top of the ground like kale, spinach and Swiss chard! I picture pineapples growing on a stalk.”

It wasn't long before all the animals in the forest were eating a variety of fruits and vegetables, thanks to Molly. Today, you'll often find Molly the monkey and her friends sitting under her favorite banana plant, surrounded by lots of fruits and vegetables.

Molly was fascinated to discover that pineapples grew on plants that were only three feet high - no taller than her. Even Mr. Raccoon was surprised! Because he ate only corn, he didn't notice the pineapples growing next to the corn stalks.

She thought about all the fruits and vegetables she'd found while looking for a pineapple. She decided to try some apples and grapes, blueberries and carrots, and kale and corn. Mr. Raccoon wanted to taste the other fruits and vegetables too.

She explained to Mr. Raccoon, “I’ve looked for a pineapple in a tree, on a vine, and in a bush. I’ve searched in the ground, on top of the ground, and on a stalk.”

“I’ve found apples and grapes, blueberries and carrots, and kale and corn. But I still haven’t found a pineapple.”
She sighed. Molly thanked Mr. Raccoon and wondered what to do next.
